

Storm & Screen Doors

Improve the look of your home in an afternoon.

WINDOWS • DOORS
Andersen®

Instant curb appeal.

Improve the look of your home with the addition of an Andersen® or EMCO® storm door. They're affordable and easy to install, providing instant beauty and charm. YOU'LL LOVE THE RESULTS.

Andersen and EMCO storm doors are at their best during inclement weather, helping protect your home and improving the energy efficiency of an entrance by up to 67%.* And that protects your pocketbook.

*Based on test results using hollow-core flush entry door with an EMCO Traditional Deluxe Series storm door. Efficiency values may vary depending on entry and storm door types.

Improve the look and energy efficiency of your home in three easy steps.

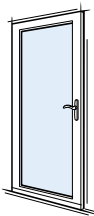

1 Measure your doorway.

See the measuring instructions on page 3 for an easy way to choose the correct door size.

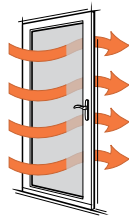

2 Choose your ventilation style.

Select from a variety of screen door styles to get the look and ventilation that's right for you.

FULLVIEW (page 4)

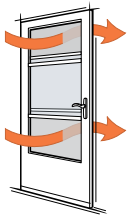

Fixed fullview doors have non-removable laminated glass that offers a weather-tight seal and added security all year long.

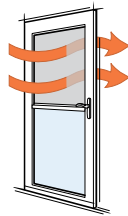

Interchangeable fullview doors provide the most ventilation when the insect screen is in place. Carefully store the panel not in use.

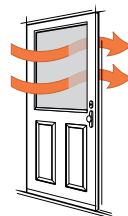

SELF-STORING (pages 6-9)

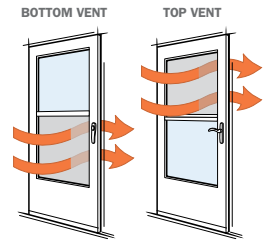

Dual-vent doors are easy to operate and let you ventilate at the top, bottom or both sections simultaneously.

Single-vent doors with a retractable insect screen offer easy, one-hand operation and a screen that simply rolls into the door frame when not in use.

Store-in-Door™ doors let you slide the glass panel or insect screen into the bottom of the door, out of sight.

Single-vent doors have a single glass panel that raises or lowers to let in fresh air.

3 Create the look you want.

Select your storm door from our extensive selection of styles, colors, sizes and ventilating options.

There are even more options for the Contemporary Series fullview door. Create your own storm door with **Andersen Storm Doors by Design**.

EASY, "OOPS-PROOF" INSTALLATION

You don't have to be an expert to install Andersen® or EMCO® storm doors. All it takes is some basic tools and a few hours. And we'll replace any lost parts or mis-cuts during installation, free of charge.*

*See the limited warranty for details.

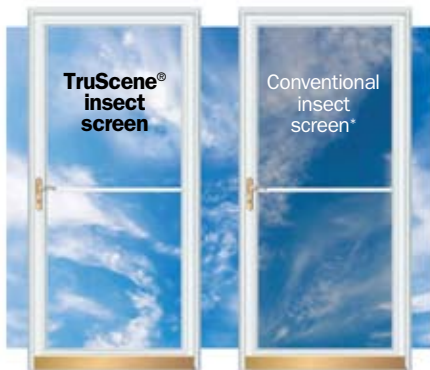

JUST GIVE US A CALL
1-800-933-3626

Love the look. Enjoy the features.

TarnishGuard™ finish protection helps Contemporary and Traditional nickel and brass handle styles retain their beauty. Oil rubbed bronze ages naturally as a “living” finish.

FlipAway™ handles swing out of the way for easy cleaning and also release glass panels or insect screens on select doors.

TRUSCENE® INSECT SCREENS

For beautifully unobstructed views, choose Andersen® **Contemporary Dual Vent Full-Lite doors** (page 6) featuring TruScene® insect screen that is made with a micro-fine stainless steel mesh and provides more than 50% greater clarity.*

EASY VENTILATION

Quickly swap the single panel of glass in our **Fullview doors** (page 4) with an insect screen. **Self-storing doors** (page 6) hold the glass panel and insect screen simultaneously, so you can switch from weather protection to ventilation instantly.

TILT-IN GLASS

Tilt-in glass panels make it simple to clean the Contemporary Series dual vent door (page 6), both inside and out.

REINFORCED FRAME

Andersen® storm doors use aluminum corner reinforcement brackets to prevent sagging.

PUSH-BUTTON CLOSER

Andersen® storm doors can be held open with a simple tap of a button.

KEYABLE LOCKS

Eliminate the need to carry an extra key by matching your Andersen® storm door lock to **Schlage®** or **Kwikset®** entrance locks. Your original Schlage key numbers make it easy to re-key your Andersen® door lock. If you don't have the original number, consult a locksmith for assistance. Kwikset® locks require the purchase of a key cylinder, which can be ordered from the Solution Center Hotline at 800-933-3626.

Find detailed information on our complete line of storm doors on pages 4-9.

NEED A PET DOOR?

See page 9.

*Compared to Andersen® aluminum insect screens. See actual samples for comparison.

Color-matched closers with push-button convenience are featured on Andersen® doors. Dual closers are provided on select doors.

Choosing the right size door is a breeze.

Andersen® storm doors conveniently attach to the exterior trim of an existing entry door. Find the door size you need by following these easy steps.

1 Height

Measure for height (**H**) from the sill to the underside of the exterior trim at the top of the door.

H _____
Record your door height.

2 Width

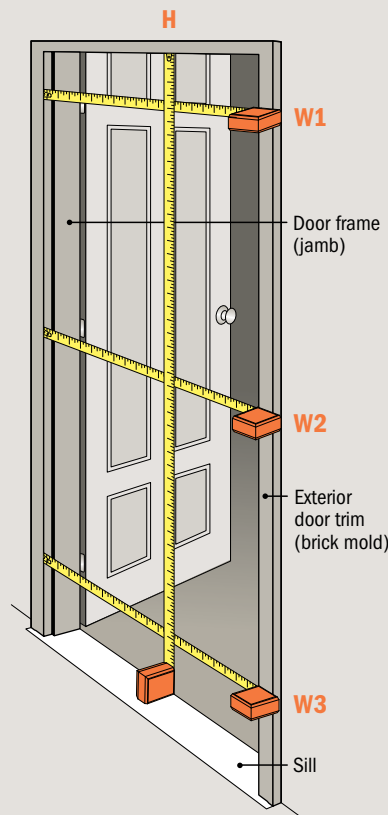

Measure the width at the top (**W1**), center (**W2**) and bottom (**W3**) of the door opening. Use the shortest measurement when ordering if they vary.

W1 _____ W2 _____ W3 _____
Record your door width.

3 Select Door Size

Use the sizing charts below to select a door size. Be sure to verify space requirements for the door you select.

Record the door size you need.

Verify Space Requirements

Verify the minimum space requirements on your existing door frame to make sure that your new storm door will fit.

DIMENSION A

- Minimum of ¾" (1.91cm) required for Andersen doors
- Minimum of 1" (2.54cm) for EMCO® doors

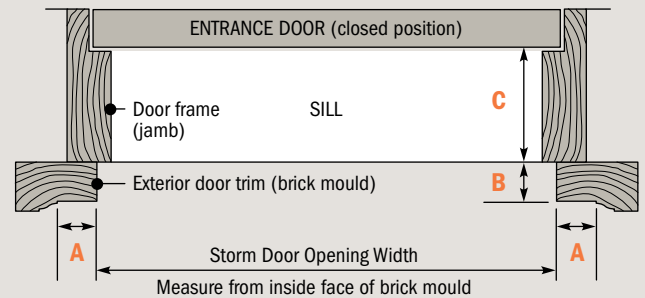

DIMENSION B

- Minimum of 1" (2.54cm) required

DIMENSION C

- Minimum of 2-½" (6.35cm) required
